Use Case CF\_ Engaging Auto Vehicle Hold (AVH).docx: Match

Description: The development requirement for the Engaging Auto Vehicle Hold (AVH) feature complies with the certification regulations in UNECE R 13-H-01. The AVH feature is designed to keep the car stationary without any active braking input, which aligns with the requirements for the service braking system, secondary braking system, and parking braking system specified in the regulation.

Use Case CF\_ Hill descent control(HDC).docx: Match

Description: The development requirement I-23897 for the new OC Subsection: 06 Driving / Braking Systems complies with the certification regulations UNECE R 13-H-01.
